

HUMAN INGENUITY. MACHINE EFFICIENCY.

Terumo BCT combines deep expertise and innovative solutions to help you automate your processes early—and take scientific ingenuity even further.

For decades, Terumo BCT has provided critical tools for visionary researchers, developers and manufacturers. Today, we're bringing that partnership to new levels with our automated cell processing technologies.

Our team of automation experts can help you integrate the equipment you need to pursue new standards of quality, to improve consistency and to scale your next-generation cell and gene therapies—potentially lowering your cost and risk in the process. And even more innovation is on the way.

Let Terumo BCT help you achieve therapeutic firsts for the patients who need them most.
